

IRIS Release Notes

v.5.6.1.7 – 08/23/2019

Pre-Case (AOR and Interest)		
Description	Type	Ticket
<p>AOR - Ability to transfer to another affiliate</p> <p>The RA now has the ability to transfer any type of AOR from one affiliate to another from the Status screen unless it is in one of the following statuses: Open, Closed, Transferred Out, 2009 Returned.</p>	Enhancement	215709
<p>AOR – Unique Key error</p> <p>Resolved issue where IRIS was producing a unique key error if an AOR was marked as is deleted and a user attempted to add a new one with the exact same Pre-Case ID. IRIS will now check to see if an “is deleted” AOR exists and, if it does, will increment the Pre-Case ID of the new AOR rather than producing an error.</p>	Bug	222243
<p>AOR – Lautenberg printable form – US Tie Immigration Status Comment</p> <p>Fixed issue where US Tie Immigration Status Comment that was entered in IRIS was not added to the printable Lautenberg form.</p>	Bug	224152
<p>Interest File – Date Filed field issue</p> <p>The “Status Date” and the “Date Filed” fields on the Status page of the Interest File has been updated to display correct values.</p> <p>Status Date: Displays the last update date. Date Filed: Displays the day the Interest file was filed.</p> <p>Note: The “Date” field under the “US Tie” tab has been removed. The field displayed the system’s current date.</p>	Bug	218595

Pre-Arrival		
Description	Type	Ticket
<p>eABN Import</p> <p>Corrected a minor bug with the eABN import process. A property setting was causing an error report periodically. However, functionality was not impacted.</p>	Bug	221620
<p>Assurance File Export - ignore "Updated Info" records</p> <p>Fixed issue where IRIS was not including a case in the WRAPS Assurance File Export if a US Tie was confirmed after the case had been assured but before the assurance file was exported.</p>	Bug	223143
<p>Assurance File Export – add row to Assurance History</p>	Enhancement	223143

Pre-Arrival		
Description	Type	Ticket
A row will now be added to the Assurance History grid on the Assurance screen indicating when the Assurance File containing the case was exported and emailed to RPC.		
* Assurance Notifications Corrected a bug that was causing some assurances to not be included in the "All Cases to be Assured" and "Assurance Date Approaching" notifications.	Bug	224841

Post-Arrival		
Description	Type	Ticket
Case Note Consolidation Consolidate and display case notes in one centralized location per program for an Affiliate/RA. <ul style="list-style-type: none"> ▪ Revamped the user interface experience for RP, MG and Other Programs case notes. ▪ The ability for an Affiliate to attach documents to various types of case notes. ▪ The ability for an Affiliate/RA to copy RP notes into MG module 	Enhancement	218484
** RP Case Notes Migration Issue The wraps import case notes were displayed under "Post-Arrival" instead of "RPC/Other Case Notes" module. The logic has been updated to save and display the case notes in the correct module.	Bug	221901
QC Updates 1. "Print" action button available to the Affiliate and the RA regardless of the form status. 2. The RA permission to view/modify the core, required and status form should be the same as the affiliate with an addition of a few other action buttons (corrections needed, accepted).	Enhancement	222704
MG Override Rule For applicable case types, the RA is allowed to use MG enrollment date if the case is enrolled after 31 days from the Arrival's date. Applicable Case Types: Asylee, Cuban Haitian Entrant, Victim of Trafficking, Special Immigrant Visa.	Bug	223165
Affiliate to view RA Other Programs in Izenda Allow the affiliate to view the records associated with the Other Programs that are created by the RA.	Bug	222621

Reports		
Description	Type	Ticket
Standard Reports - IsDeleted and CaseActiveStatusID changes	Enhancement	215260

Reports		
Description	Type	Ticket
Modified all Standard Reports to ignore data that has been marked for deletion. In some reports, IRIS had been including the marked for deletion records, which was affecting case and individual counts. We also changed most reports to only include cases where the Active Status was "Active," ignoring "Inactive" and "Closed" cases. For some reports, including cases with an "Inactive" status made sense, so we did not modify them.		
Bug MG PPR Drilldown Corrected issue where the drill down to a subreport from section D was not working.	Bug	223094
QC Standard Reports Added standard reports to allow the Affiliate/RA to report on various sections of the QC form.	Enhancement	222781
MG Cash & In-Kind Summary Report Update categories verbiage to: <ol style="list-style-type: none"> 1. Case Management (CM) 2. Employment Services (EMP) 3. Core Maintenance Assistance Services (CMA) 4. Administration (ADM) 5. English Language Training (ELT) 6. Health and Medical Services (MED), post-R&P period for R&P clients 7. Employment Training or Recertification (ETR) 8. Social Adjustment Services (SAS) 9. Support Services (SS) 	Bug	224160
* Standard Reports – Unexceptional Error A few of the standard reports were throwing an unexceptional error when moved to Azure environment. Impacted Reports: <ol style="list-style-type: none"> 1. RP RA Summary 2. 90 Day Timeliness 3. 90 Day Corrections Needed 	Bug	224871

Administration		
Description	Type	Ticket
Custom Report Turn Off - email notification To aid in quick resolution, IRIS Support staff will now be notified via email when the Custom Report link disappears from the IRIS dashboard. This is currently happening due to an issue with the Izenda software that powers Custom Reports.	Enhancement	220446
Help Desk Widget/Icon Remove help desk icon from custom reports design view. The floating icon can interfere with the custom report tools.	Enhancement	221078
Cosponsor Field Codes	Enhancement	220783

Administration		
Description	Type	Ticket
Cosponsor field codes may be used from the case form tab. Previously those codes were only available from the cosponsor tab.		
Case Pool Field Code New form template field code has been added for case pool.	Enhancement	220782
Unique Alien Number Rule Previously, a non-refugee case member could not have the same alien number as a refugee (R&P) case member. This update provides a warning message indicating the alien number is used by a refugee. The non-refugee may be saved with the accurate alien number.	Enhancement	221775
* Email Announcements - Timing out The email broadcast functionality logic has been updated to accommodate office 365 max recipient restriction.	Bug	224843
Affiliate Maintenance The Affiliate will be allowed to view the "Program Capacity" screen from the Affiliate Maintenance functionality in a read-only mode. The assigned zone "tab_ProgramCapacity" needs to be associated with an affiliate group from the "Group Maintenance" functionality.	Enhancement	221337
Custom Report Core Upgrade Upgrade to version 6.10.0.39 which implements minor improvements and bug fixes to core custom report capability.	Enhancement	222084
Dashboard Notification Optimization The IRIS dashboard screen has performance improvements to address slow response times. The counts displayed for each notification will be updated at approximately five-minute intervals. Previously, the counts were updated each time the page was accessed and then the page was updated on a personalized frequency.	Enhancement	220951
Custom Report Email Scheduler Fixed a bug that was preventing scheduled custom reports from being emailed.	Bug	222566
Azure – Assurance Signatures Moved RA signatures to the database to make them more secure and added a UI mechanism for uploading them into IRIS.	Enhancement	223078

* Deployed on 08/25/2019

** Deployed on 08/27/2019
