Pre-Arrival		
Description	Type	Ticket
Changed the "Co-Sponsors Added or Modified" dashboard notification to exclude cases once they have been arrived for more than 60 days since those cases do not require reinsurance.		
<b>AOR Status Issue</b>  Fixed issue that was introduced when we went live with IRIS v.5.6.1, in which release we create an "Update Info" row in the AOR History grid on the Status screen when a case is transferred to another affiliate. The bug was that if you closed the AOR and then reopened it, IRIS was erroneously setting the Status of the AOR to "Updated Info," which is only a placeholder and not a status at all. This issue has been resolved. IRIS will now skip over any Update Info rows in the AOR History grid and reset the status to the last valid status that the AOR was in.	Bug	226627
