

IRIS Release Notes

6.0.1.1 – Released 9/28/2020

Pre-Arrival		
Description	Type	Ticket
START Assurance File Update Assurance files to RPC will now go to two destination email addresses; one for WRAPS cases and one for START cases.	Enhancement	252812
Lautenberg AOR Fixed a bug that was requiring divorce information for a spouse who died during the marriage.	Bug	254312

Post-Arrival		
Description	Type	Ticket
RP Case Note Copy to MG Case Note Corrected an issue where the Mode was not copied from an RP case note to an MG case note.	Bug	253189

Matching Grant		
Description	Type	Ticket
MG QC Title Changes Update title of pages	Enhancement	252816
MG Affiliate Quarterly Report Console Updates Updated so MG row does not show if Affiliate does not have MG for the selected year.	Enhancement	252817
MG Case Extension Multiple Enrollments in One Month Corrected a bug where rapidly clicking submit may enroll a case multiple times in a single month.	Bug	253214
MG Case Extension for October Added October to the list of enrollment months. Rule that enrollment in September is required before enrolling in October.	Enhancement	253413

Reports		
Description	Type	Ticket
Custom Reports Cross Reference Data Source	Enhancement	251865

Reports		
Description	Type	Ticket
The custom report data source currently shows the cross-referenced case's arrival date from the BioData cross reference data. If the cross-referenced case has arrived and is in IRIS, then the arrival date will be the actual case arrival date. Sometimes the cross-reference arrival date is blank. This update makes the arrival date more accurate and complete.		
MG PPR Report When a single affiliate was selected, corrected issue where total row for PT and FT wage differed from affiliate row.	Bug	254001
Bug "MG Enrollments by Affiliate and Site – Summary" Corrected issue where a start date after the first of the month would exclude that month.	Bug	254466

Administration		
Description	Type	Ticket
Deleted Principal Applicant Showing in Case Header If a case has a deleted PA, the deleted PA was erroneously displayed in the header.	Bug	251859
Data Refreshes When the Test IRIS instances are refreshed with data from Prod, the fields in the Wraps Export section of Admin Configuration are set to iris-test@lirs.org to prevent emails from being sent to actual people in Test. That was true of all fields except for PRMTransferAddress, which has now been added.	Enhancement	254330
